PROFILE

Full-Stack Software Engineer with nearly 4 years of experience building scalable, reliable web applications and backend systems for travel-tech and fintech products. Skilled in Node.js, TypeScript, React, Angular, AWS, REST APIs, microservices, event-driven architecture, payment integrations, and cloud-native development. Delivered end-to-end solutions spanning customer-facing UI, backend APIs, payment collection, webhooks, reconciliation, notifications, hotel integrations, programmatic SEO, and observability. Proven experience improving application performance, production reliability, incident response, and monitoring cost efficiency.

WORK EXPERIENCE

Software Engineer II | udChalo (June 2025 – Present)

- Built an end-to-end payment collection platform using Node.js, React, and AWS, covering customer UI, payment orchestration, webhooks, and notifications.
- Integrated Easebuzz payments across UPI, cards, net banking, EMI, and wallets, with idempotency, retries, failure recovery, and reconciliation.
- Led the design and implementation of distributed Node.js microservices on AWS, improving scalability and reducing latency by 25% in peak-traffic flows.
- Built an Angular Control Tower application and supporting backend services used by Customer Support and Operations teams.
- Delivered a full-stack hotel platform with inventory and booking integrations, agent dashboard, and SEO management for 10,000+ landing pages.
- Implemented Prometheus and Dash0 observability, improving log visibility and reducing annual monitoring costs by approximately USD 3,000.
- Architected event-driven notification workflows using AWS PinPoint, SNS and SQS across all communication channels, achieving 99.9% delivery reliability.
- Automated incident-response workflows using AWS Lambda and Zenduty, reducing mean time to resolution by 40%.
- Implemented Google OAuth sign-up and login workflows, including React-based authentication UI and backend integration.
- Applied secure coding practices, PII masking, and release validation across customer-facing services and integrations.
- Led Redis Enterprise migration and Node.js upgrades across the platform, improving service compatibility and saving approximately USD 1,000 monthly.

Software Engineer | udChalo (February 2023 – May 2025)

- Integrated Airline NDC APIs for Air India, IndiGo, and Star Air, reducing booking failures by 15% and improving booking-workflow reliability.
- Built real-time flight tracking and notification pipelines, reducing customer-support queries by 20% through proactive customer updates.
- Developed high-throughput Node.js APIs and optimized backend performance, reducing average API response time by 30%.
- Developed dynamic fare workflows for student and medical travelers, improving special-fare adoption and customer retention.
- Integrated fintech services for credit card, credit scores, and lending workflows using LoanTap and Money View.
- Integrated ICICI Lombard and Aditya Birla insurance products into flight booking flows, increasing policy adoption by 15%.
- Built automated financial reporting and compliance data pipelines to support operational reporting and audit workflows.
- Improved airline-provider session management and transaction retry logic, reducing booking failures by 15%.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, SQL

Frontend: React, Angular, Chakra UI, HTML, CSS, Responsive UI Design, REST API Integration

Backend & APIs: Node.js, Microservices, REST APIs, GraphQL, Event-Driven Architecture, Distributed Systems, System Design, Webhooks, API Integrations

Cloud & DevOps: AWS (Lambda, S3, ECS, SNS, SQS, CloudWatch), Docker, Jenkins, CI/CD, Kubernetes

Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis, SQL, NoSQL, Query Optimization

Payments & Integrations: Easebuzz, CleverTap, Firebase Cloud Messaging (FCM), Airline NDC APIs, Hotel Integrations, ICICI Lombard, Aditya Birla, LoanTap, Money View, Payment Collection, Reconciliation

Monitoring & Observability: Prometheus, Dash0, New Relic, Sentry, Grafana, Kibana, AWS CloudWatch, Zenduty, Logging, Alerting, IM Automation

Security & Reliability: OAuth 2.0, Google OAuth, PII Masking, Secure API Integrations, Idempotency, Retry Mechanisms, Failure Recovery

AI-Assisted Development: Claude Code, OpenAI Codex, Cursor

Tools & Collaboration: Git, Bitbucket, Jira, Agile, Code Reviews

FULL-STACK PROJECTS (INDEPENDENT)

- **Apna Bazar** ([Live](#) / [GitHub](#)) — Developed a full-stack e-commerce platform with secure authentication, product management, cart, and order workflows.
- **ShubhYatra** ([Live](#) / [GitHub](#)) — Built a travel-booking application for flights, buses, and trains using React, Node.js, and scalable REST APIs.
- **Reliance Digital Clone** ([Live](#) / [GitHub](#)) — Developed a React e-commerce application with authentication, wishlist, cart, checkout, MongoDB-backed REST APIs.
- **Mailchimp Clone** ([Live](#) / [GitHub](#)) — Built and deployed a responsive React application with authentication, dynamic pricing, and Chakra UI components.

EDUCATION & ACHIEVEMENTS

B.E. Mechanical Engineering — Savitribai Phule Pune University, Maharashtra | Aug 2017 – June 2021 | CGPA: 8.64/10

Star Performer Award — FinServ (2025) · Rookie Rockstar of the Month — 3x (2025) · Project of the Year — Price Drop Assurance (2024) · “You’ve Made a Difference” Award (2024) · Rising Star Award (2023)
